Paul Stanley Ganganapalli

AI Agent Developer | LangChain · LangGraph · RAG | LLM Projects |
Python · FastAPI · OpenAI | Open to Full-Time & Freelance
Leinfelden-Echterdingen, Baden-Württemberg, Germany

Summary

Mechanical Engineer (Masters, 2021) with a pivot into AI Agent Development. After my Masters in mechanical engineering, I worked a year as a design engineer. Then I explored trading for 6–7 months — learned about markets, risk management, and decision-making under uncertainty. But I realized AI was what I actually wanted to build. So in 2024–2025, I taught myself coding from scratch. Since then, I've built multiple AI agent systems focusing on real, production-ready solutions. What I build: → Job Scraper Agent — autonomous resume optimization against job listings → RAG Architecture Benchmark — tested and compared different RAG approaches → Deep Research Agent — autonomous research, synthesis, and reporting → Multi-Agent Chatbot — specialized agents coordinated via LangGraph → Software Engineering Agent — autonomous code generation and debugging → Predictive Maintenance Agent — real industry use case with sensor data. What I've learned: Most AI projects are demos. I focus on building things that actually work — systems that solve real problems, not impress people. Tech: LangChain · LangGraph · OpenAI API · RAG · Pinecone · ChromaDB · FastAPI · Streamlit · Python · Docker. Looking for: Full-time AI Agent Developer role (remote or on-site, anywhere) or freelance projects. GitHub: github.com/PaulStanley0211

Experience

Freelance

Equity, Derivative and commodities Trader
June 2022 - September 2025 (3 years 4 months)
India

1. Executed high-volume trades across equities, derivatives, and commodities, leveraging market trends and analysis to maximize profitability.
2. Applied technical and fundamental analysis to identify profitable trading opportunities and manage risk effectively.

3. Developed and implemented trading strategies that consistently delivered strong returns in volatile market conditions.
4. Managed risk exposure by using advanced hedging techniques and monitoring market fluctuations in real time.
5. Collaborated with research teams to stay ahead of market trends, ensuring well-informed trading decisions.
6. Analyzed and monitored macroeconomic factors and market events to forecast potential impacts on asset prices.

Mechanical Design Engineer

March 2021 - February 2022 (1 year)

Visakhapatnam, Andhra Pradesh, India

1. Designed and developed detailed mechanical components and systems using advanced CAD software to meet project specifications.
2. Collaborated with cross-functional teams to ensure design feasibility, functionality, and alignment with engineering standards.
3. Conducted thorough design reviews and revisions, optimizing designs for performance, manufacturability, and cost-efficiency.
4. Created 3D models, technical drawings, and assembly instructions to support product development and production.
5. Applied engineering principles to troubleshoot design issues, ensuring high-quality and reliable solutions throughout the product lifecycle.

VISAKHAPATNAM STEEL PLANT

Light and Medium Merchant Mill

June 2016 - July 2016 (2 months)

Education

Rīgas Tehniskā universitāte (Riga Technical University)

Master's degree, Mechanical Engineering · (2019 - 2021)

Karunya Institute of Technology and Sciences

Bachelor's degree, Mechanical Engineering · (June 2014 - June 2018)
